Preventing post-COVID
Social Exclusion Together

Seminar

The invitation to the regional seminar of the project

The international project *Preventing post-covid social exclusion together* (implemented from 2021 to 2022) was aimed at helping to reduce the extent of educational and social inequalities in peripheral areas where the effects of the Covid-19 pandemic on education were more severe than in urbanized and more developed regions.

The results of a questionnaire survey carried out at lower-secondary schools in the Ústecký Region will be presented, and the situation in peripheral areas in Poland will also be described. In addition to recommendations for managing these negative impacts, examples of inspiring practice from the period of school closures and other government measures in the field of education during the Covid-19 pandemic will also be presented, including the program of the organization People in Need – online tutoring and support for education with the involvement of volunteers.
